DETAILED ACTION

- 1. This action is responsive to communications: original application filed 07/03/2003
- 2. Claims 1-59 are currently pending in this application. Claims 1, 6, 11, 18, 24, 30, 38, 42, 49, and 54 are independent claims.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-5, 18-23, 42-48, 49-53, and 54-59 are directed toward Packet header designating cryptographically protected data, classified in class 713, subclass 160.
 - II. Claims 6-10 and 24-29, and 42-48 are drawn data computer-to-computer data streaming, classified in class 709, subclass 231.
 - III. Claims 11-17, 30-37, and 38-41 are drawn to packet filtering, classified in class 726, subclass 13.

It is noted that Sets I and III are directed toward the current Examiner's art. It would be preferable if either Sets I or III are elected. Otherwise, the case will be transferred into another work group and examined there.

Application/Control Number: 10/612,851 Page 3

Art Unit: 2134

4. The inventions are distinct, each from the other because of the following reasons:

Inventions I through III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention (I) has separate utility such as encryption with RTP packets, (II) has a separate utility such as creating RTP packets, (III) has a separate utility such as creating mixed media packets,

- 5. Because these inventions are distinct from the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above, the search required for Group I is not required for Groups II or III; and the search for Groups I or III; and the search for Groups I or III.
- 7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the –fee required under 37 CFR 1.17(i).

If applicant elects Group I above, an election of species within that group is required.

9. This application contains claims directed to the following patentably distinct species:

Species A is directed toward the encryption of RTP packets. Claims 1-5 and 18-23are directed toward this embodiment..

Species B is directed toward changing a plurality of single media packets into a composite packet. Claims 42-48 seem to be directed toward this embodiment

Species C is directed toward assembling portions of media packets into contiguous payloads. Claims 49-53 appear to be directed toward this embodiment.

Species D is directed toward utilizing ASF packets. Claims 54-59 appear to be directed toward this embodiment.

10. The species are independent or distinct because the claims are directed toward different methods which serve different purposes and are independent of one another.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, 11. even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason K. Gee whose telephone number is (571) 272-6431. The examiner can normally be reached on M-F, 7:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kambiz Zand can be reached on (571) 272-3811. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
